1. At present there is a considerable amount of reorganization taking place in the M.S.P. The Davidov Group has gone back to Russia and his department is gradually closing down. Some of the specialists are going to Borisov's department, others to Malikov's, and some are being discharged.
2. The Slavgorodsky department is gradually transferring itself to Wismar and Warnemünde. The Wismar section is now working on destroyers. There have been a number of dismissals and others will be given notice if they do not consent to transfer to the Wismar/Warnemünde area.
3. In the department of Malikov, great emphasis has been placed on production of radar sets working on the 10 cm. band and also, in particular, on the "Berlin" system. There is a very great shortage of spare parts and drawings, but in spite of this, orders have been given that 10 sets should be completed by the end of March 1948. As a result, Schutte and Draeger have given notice to the Russians, as they say it is impossible to fulfill the tasks required.
4. Borisov is now turning his attention to larger units, such as cruisers and battleships. To do this, he has been trying to recruit ship-construction engineers from the former German Kriegsmarine, particularly men who had leading positions at Wilhelmshaven and Kiel; he is not having much success, although Woelke and Barheine are constantly going to the West to recruit specialists. Reports on previous work done by these men are being obtained and up to 50,000 RM have been paid for one piece of work.
5. The general reduction in staffs at the M.S.P. and branch stations is to be 40%, about 1,000 people. A preliminary list of those discharged in various departments is given below:
